Tian Shan is one of the highest mountain ranges in the world. But it is its central part - the central Tian Shan - which is characterized by the maximum glaciation; there are indeed giddy heights here. Beautiful mountains (7000m), surrounded with their less high "brothers" settled down compactly here. The trek route presents some grand possibilities not only to set off trekking up on the huge Inylchek glacier divided into Northern and Southern torrents, but also to see the well-known Mertsbahe Lake, and the main thing to touch the very root of magnificent, almost mythical giants - peaks of Khan -Tengri and Pobeda(Victory).
