- ✧ **Liuhe Tourist Night Market:** You will not be considered to visit Kaohsiung if you miss out Liuhe Night Market. As early as in 1950, more and more stalls came to be stationed in Dagangpu of Xinxing District in Kaohsiung, finally forming the well-known "Dagangpu Night Market". No matter what you like to have, a variety of delicious food, specialties, cold drinks, ices and seafood here are offered for your choice. Just remind you, don't miss the opportunity to taste the papaya milk and steamed salty shrimps in Kaohsiung.
- ✧ **Eluanbi Park (Light house):** Kending's rugged coastline provides some of the area's most outstanding attractions. The most prominent of these must be Eluanbi, also known as "Taiwan's Tail". This is the island's southernmost point. Eluanbi Park was created in 1982 to provide an appropriate venue for people coming to visit Taiwan's southernmost point and one of the peninsula's most notable landmarks, the Eluanbi Lighthouse, also called "The Light of East Asia". It stands 21.4 meters high and is reputedly the brightest lighthouse in Asia. The park covers an area of 59 hectares. Within the park there are a number of recreational facilities and a wide range of interesting geological, botanical, and ornithological features. The area covered by the park is also one of the sites of Kending's prehistoric cultures.
- ✧ **Maobitou:** Maobitou is located in the west cape of southern Taiwan, right on the demarcation point of Taiwan Strait and Bashi Channel. Since there is a rock falling from the sea cliff which looks like a crouching cat facing toward the sea, it is named Maobitou. The whole area of Maobitou is a typical erosional landform of coral coast which just faces windward and has abundant sea erosion. It is an excellent landform classroom with various scarps, reef columns, sea trenches, sea erosion caves and pot holes.
- ✧ **Longpan Park:** Longpan is the great grassland beside the Jia-Oh highway and near the beach of Pacific Ocean. This area is based on the tableland of coral reef limestone. Eroded by the rain, the terrain of limestone shows a variety of crumbled ridges, subterranean limestone caves, and red soil.
- ✧ **Hengchun Town:** The city of Hengchun is the entry way to Kenting National Park, the southernmost National Park in the country. With pristine beaches and a vibrant tourist industry, the Hengchun area often attracts more travelers than local residents. The city itself was once completely surrounded by a city wall; now about half of the wall remains intact, as well as the four city gates. On weekends, the streets of nearby Kenting are filled with cars and tour buses. The 2008 Taiwanese film Cape No. 7, the top-grossing film in Taiwan's film history, features Hengchun.
- ✧ **Chikanlou:** Tainan Chikanlou is built by the Dutch in 1652. It was originally called Provintia. In Dutch it means eternity. The Chinese called the building "Chikanlou", "Fanzailou" or "Honmaolou". Although Chikanlou has gone through Ming Dynasty, Qing Dynasty and the Japanese Colonization Period, it basically still maintains its original look. During the Japanese colonization period, Chikanlou was changed to be army hospital. There were some restoration and repair. After Taiwan was returned to R.O.C., the wooden structure was changed into steel concrete structure. The main entrance was changed. Thus they created the look of Chikanlou today.
- ✧ **Koxinga Shrine:** The Guoxingye's Shrine (Yanping Junwang Temple), located by Kaishan

Road surrounded by trees, is the only Fujianese style shrine in Taiwan. This is the shrine built in memory of the work and achievement of Cheng Cheng Kung, the pioneer of Taiwan. Cheng Cheng Kung was originally called Cheng Sun, a native in County Fujian. In addition, daily items of Tainan city of the old like the street signs, bedding equipment, land deeds, money bills are on exhibition so that the public can understand the daily life of the past generations. It is a cultural spot very worth visiting.

- ✧ **Anping Fort:** In 1624, Dutch built the first fort in Anping, Taiwan, called "Fort Zeelandia", now known as Anping Fort, where has been the administrative center of the Dutch regime, and the hub for trading. The building was originally constructed in square inner fortress and rectangle outer walls. In 1661, the fort was renamed as Anping to commemorate his home town when Guoxingye (Cheng Cheng-Kung) has driven the Dutch out of Taiwan. Therefore, Fort Zeelandia was also known as "King's Fort" or "Taiwan Fort", nicknamed Anping Fort.
- ✧ **Anping Tree House:** It was the original warehouse for British trading company Tait & Co. The aerial roots and branches of trees wrapped around the building, combine with soil, red brick and partial concrete wall creates an unusual sight.

- ✧ **East Coast National Scenic Area:** The East Coast National Scenic Area, known as "Taiwan's last unspoiled land," stretches 170 kilometers down the east coast of the island from the mouth of the Hualien River in the north to Xiaoyeliu (Little Yeliu) in the south. To the east it is bounded by the Pacific Ocean; to the west rises the Coastal Mountain Range. The land here consists of volcanic rock, classic rock from deep beneath the sea, and shale that has been pushed upward- and is still being pushed upward- by tectonic action. Weathering, erosion, and accumulation have produced a wide range of landforms here, including coastal terraces, sand and pebble beaches, shoreline reefs, inshore islands, and capes along with sea-eroded platforms, trenches, and caves. This varied topography provides habitat for a rich diversity of flora and fauna.

- ✧ **East Rift Valley:** The East Rift Valley is a long, narrow valley flanked by the Central Mountain Range to the west and the Coastal Mountain Range to the east. This is where the Eurasian and the Philippine tectonic plates collide, resulting in the creation of many fault lines. Due to its location between the Coastal Mountains Range to the east and the Central Mountains Range to the west, and the difference of over 2,000 meters in altitude between the valley and mountain ranges, there is an abundance of plant life in the East Rift Valley.

After millions of years of wind erosion, the marble rocks were exposed and cut by Liwu River, creating impressive grand canyons. From Qingshui to Nanhu Peak, the drop height is 3,742 meters. Such special geography has also bred special flora and fauna in this area. Following the Central Cross-Island Highway, at Yanzikou (Swallow Grotto) the rock cliffs of the Liwu River gorge seem to reach to heaven while the river runs its swiftest and the distance between the gorge walls so narrow that they almost seem to touch each other.
